

JSL Store — Business Dashboard

A monthly read of sales and stock across all 16 measures — how much the store really earns, where the profit leaks, and what to fix. Bihar / Jharkhand

 Sales: Sep 25 – Jun 26 (10 mo)

 Stock file: soh30626.xlsx

 6,640 bills · 17,896 pieces · ₹2.98 Cr

 16 staff · 2,561 known customers

THE HEADLINE

A busy store that sells well — but keeps little profit

Over 10 months the store sold **₹2.98 Cr**. After the cost of goods and running costs it kept about **₹13.4 L** — **roughly 4%**. Every item is bought at about **64% of its tag price**, so at full price the margin is ~36% — but the average discount of **17%** pulls the realised margin down to **24%**.

REPEAT CUSTOMERS

37%

Drive 63% of tracked sales

The one-line story: the store earns a healthy ~36% at full price, but discounting and running costs leave only 4% at the bottom. **Profit is given away at the till and tied up in slow stock — not lost at the counter.**

WHAT'S COVERED

1 · Staff productivity → §6

2 · Average bill value → §6

3 · Repeat / new customers → §6

4 · Month-on-month P&L → §2

5 · Dead stock → §5

9 · Out-of-stock items → §5

10 · Item-wise → §4

11 · Gender-wise → §4

12 · Top 20 brands → §3

13 · Size analysis → §4

6 · Fast-moving stock → §5

14 · Accessories → §4

7 · Stock turnover → §5

15 · Discount → §2

8 · Ageing → §5

16 · Margin → §2 & §3

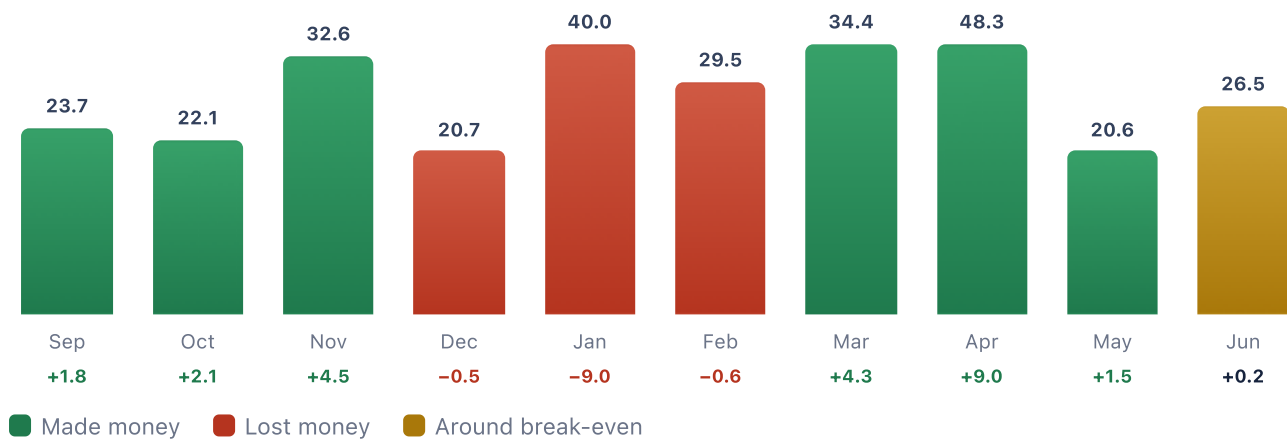

1 · SALES THROUGH THE PERIOD

Which months made money — and which gave it back

The store runs at roughly ₹20.6 L–₹48.3 L a month. The colours below show whether each month actually made or lost money after all costs — the number under each bar is the profit or loss.

Monthly net sales (₹ lakh) — green = profit month, red = loss month

Bar height = sales. Colour & number = profit/loss that month after cost of goods and running costs.

Best month Apr 26: +9.0 L. Weakest Jan 26: -9.0 L. The good months carry the weak ones — the biggest swing factor is how deep the discounting goes.

2 · THE MONEY — PROFIT, DISCOUNT & MARGIN (#4, #15, #16)

Discount is the biggest lever on profit — past 36% off, the store sells at a loss

Goods cost about **64% of the tag price**, so any discount above **36%** sells the item **below cost**. Keep 36% as the hard ceiling for normal selling.

Month-by-month profit & loss (₹ lakh)

Cost of goods estimated from the stock file (every sold item matched to its cost). Running cost = 7% of sales + rent ₹2.2 L + electricity ₹1.0 L + misc ₹0.4 L per month.

MONTH	NET SALES	DISCOUNT	COST OF GOODS	GROSS PROFIT	RUNNING COST	PROFIT / LOSS
Sep 25	23.7	8%	16.6	7.1	5.3	+1.8
Oct 25	22.1	5%	14.8	7.3	5.1	+2.1
Nov 25	32.6	9%	22.3	10.4	5.9	+4.5
Dec 25	20.7	19%	16.1	4.6	5.0	-0.5
Jan 26	40.0	40%	42.6	-2.6	6.4	-9.0
Feb 26	29.5	22%	24.5	5.0	5.7	-0.6
Mar 26	34.4	9%	24.1	10.3	6.0	+4.3
Apr 26	48.3	6%	32.4	15.9	7.0	+9.0
May 26	20.6	6%	14.0	6.6	5.0	+1.5
Jun 26	26.5	18%	20.8	5.6	5.5	+0.2
10 months	298	17%	228	70	57	+13

The 36% rule. Because goods cost ~64% of the tag, any discount above **36%** sells below cost. Go beyond it only for stock you have decided to dump.

What discount cost: ₹60.1 L was given away in discount over 10 months — against a gross profit of ₹70.3 L. Cutting average discount by **5 points** is worth roughly **₹17.9 L a year**, straight to profit.

3 • BRANDS (#12, #16)

Which brands actually make money

Two questions per brand: how much it sells, and how much it keeps after discount. Watch the **margin** column — big sales with low margin means cash tied up for little profit.

TOP 20 BRANDS (BY SALES)	PIECES	SALES ₹L	DISCOUNT	MARGIN	STOCK ₹L	VERDICT
U.S. Polo	690	17.7	26%	11%	16.4	Healthy
Allen Solly	1,015	16.9	33%	3%	23.0	Big, thin profit
Van Heusen	685	15.7	28%	9%	32.2	Big, thin profit
Louis Philippe	553	14.3	30%	5%	20.8	Big, thin profit
Killer	705	12.6	34%	-2%	14.9	Selling at a loss
Levis	423	9.5	35%	-1%	15.7	Selling at a loss
Fw	307	6.8	5%	34%	4.8	Star — grow it
Arrow	337	6.8	29%	1%	22.4	Thin profit
Mufti	286	6.0	36%	-5%	8.4	Selling at a loss
Jay Ambey	127	5.9	5%	41%	3.8	Star — grow it
Plazer	191	5.3	4%	39%	2.9	Star — grow it
Yes Mam	179	4.8	4%	36%	4.0	Star — grow it
Peter England	258	4.8	30%	7%	14.0	Thin profit
Citrus	314	3.9	3%	28%	6.2	Star — grow it
Ashmita Bq	160	3.6	6%	36%	2.8	Star — grow it
Hyphen	182	3.4	3%	33%	3.2	Star — grow it
Khushaal	66	3.3	3%	39%	2.9	Star — grow it
Jockey	861	3.3	9%	23%	3.6	Healthy
Blackberry	152	3.1	23%	7%	0.1	Thin profit
Gajendra	91	3.0	5%	37%	0.7	Star — grow it

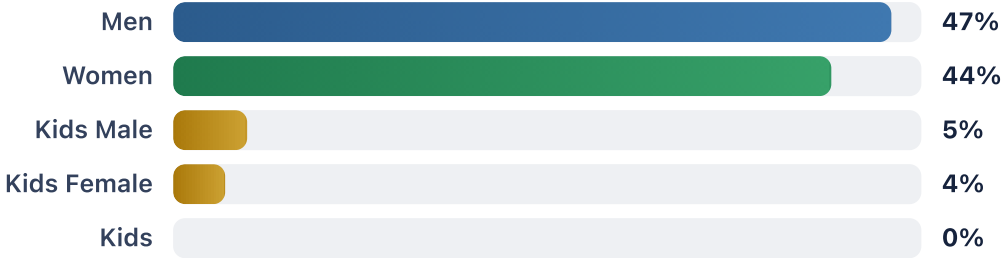

Brand codes merged where the same brand appears under several names. Margin is after discount, using each item's cost from the stock file.

The lesson: the high-margin earners here are **Fw, Jay Ambey, Plazer, Yes Mam, Citrus, Ashmita Bq**. Give them more space and stock; buy the low-margin, heavily-discounted brands more tightly.

Where the sales and the margin come from

Who the store sells to

Share of money taken, by section.

TOP ITEMS	PIECES	SALES ₹L	AVG PRICE	DISCOUNT	READ
Saree	2,070	46.5	₹2,247	5%	Full price
Shirt	2,076	36.1	₹1,739	25%	Heavily discounted
Jeans	1,628	33.0	₹2,028	28%	Heavily discounted
Kurti Set	1,413	30.5	₹2,157	6%	Full price
T-Shirt	1,488	16.3	₹1,098	21%	Heavily discounted
Trouser	795	14.4	₹1,815	27%	Heavily discounted
Suit	225	13.9	₹6,194	9%	Some discount
Jacket	513	13.6	₹2,644	34%	Heavily discounted
Salwar Suit	355	9.1	₹2,565	4%	Full price
Blazer	219	8.9	₹4,047	26%	Heavily discounted
Lehenga	94	7.7	₹8,238	5%	Full price
Sweatshirt	465	7.7	₹1,652	31%	Heavily discounted

Sizes — fastest movers (#13)

Top sizes by pieces sold; % = how much of that size's stock has sold.

- **Men:** M (44%), L (38%), FREE SIZE (44%), XL (35%), 32 (35%), 40 (32%)
- **Women:** FREE SIZE (47%), L (57%), XL (48%), M (39%), XXL (25%), S (30%)
- **Kids Male:** 14 (48%), 12 (44%), 8 (35%), 10 (31%), FREE SIZE (29%), 6 (35%)
- **Kids Female:** FREE SIZE (42%), 36 (39%), 26 (27%), 34 (32%), 24 (22%), 28 (26%)

Accessories (#14)

Accessories sold **₹8.9 L** over 10 months on **₹6.7 L** of stock — a healthy add-on business. Push them at the counter to lift the bill with little risk.

How much stock, how old, and how fast it turns

The store holds ₹3.99 Cr of stock (₹6.28 Cr at tag price). At the current selling speed that is about **17 months** of stock — a healthy clothes shop carries 3–4 months. Only **19%** of stock value is in styles that have sold even once.

STOCK TURNOVER (#7)

0.7x/yr

~17 months to sell · target 3–4x

AGING STOCK, 6 MO+ (#5, #8)

₹1.44 Cr

Not sold in 6+ months

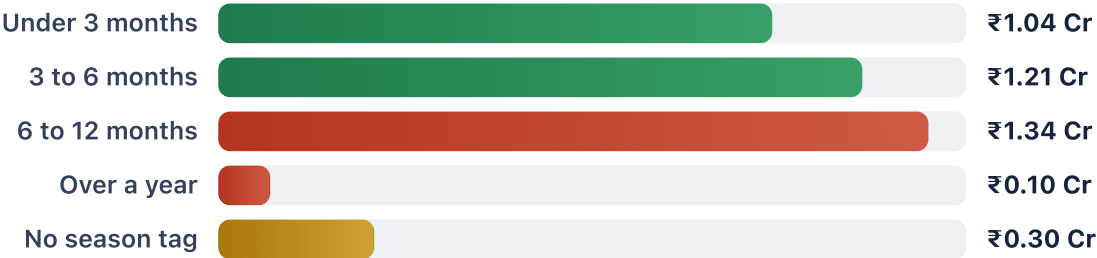

OUT OF STOCK ON FAST ITEMS (#9)

1184

Sold recently, now at zero

Stock by age (at cost) (#8)

Green = fresh, give it time. Red = old, clear it.

Where the slow money sits (#5)

Stock not sold in the period, by item: **Shirt ₹60.3 L · Jeans ₹50.9 L · T-Shirt ₹34.6 L · Trouser ₹28.3 L · Suit ₹23.9 L · Saree ₹20.8 L.**

The real problem: wrong mix (#6, #9)

The store is **overstocked overall yet out of stock on 1184 fast items** that sold recently and are now at zero. Money is locked in slow styles while fast ones run dry — a buying & replenishment problem, not a quantity one.

The customer base and the staff scorecard

AVERAGE BILL (#2)

₹4,494

2.7 pieces per bill

REPEAT CUSTOMERS (#3)

37%

Drive 63% of tracked sales

BILLS WITH A PHONE

67%

33% not captured

Customers: 2,561 customers are known by phone, and the top 5% bring **26%** of sales. Only 67% of bills capture a phone number — fixing that unlocks WhatsApp reminders to repeat & lapsed customers.

Staff — sales and price held (#1)

Note the last column: some staff hold 96% of the tag price, others 55%. Part is the section they work, but it is also a coaching gap worth real money.

SALESPERSON	SALES ₹ L	BILLS	AVG BILL	PRICE HELD
Punam Kumari	31.8	755	₹4,207	94%
Sunny Sonar	29.0	831	₹3,489	75%
Niraj Rajak	26.3	622	₹4,235	75%
Anjali Kumari	23.8	760	₹3,131	92%
Dilip Rajwar	23.2	656	₹3,542	78%
Ruby Kumari	22.0	709	₹3,102	93%
Prity Kumari	20.3	818	₹2,486	92%
Poonam Rana	19.9	653	₹3,047	90%

16 staff in total. Measure each on **price held**, not just sales value. (Sales-per-hour isn't possible — no attendance/targets in the data.)

7 · WHAT WE COULD NOT MEASURE — AND WHY

Being straight about the limits

- **True conversion rate — not possible.** No footfall / door-counter data exists, so we show repeat vs new customers, not sales ÷ walk-ins.
- **Profit is a close estimate.** The sales export has no cost column, so cost of goods is taken from the stock file (every sold item matched to its cost). Running cost uses the 7%-of-sales + rent/power/misc figures in the config.
- **Only 10 months of sales** are in the data, so "dead stock" means not sold in that window; fresh stock is shown separately by age.
- **No colour analysis.** The "Colour" field in the sales export is a price band, and the stock file has no colour — so we can analyse sizes, not colours.

8 · WHAT TO DO — BIGGEST PROFIT FIRST

The priority moves

1 Cap the discount — never sell below cost

Set a firm ceiling of **36% off** for normal selling. Plan the clearance so it does not repeat Jan 26's loss.
↳ Biggest lever — a 5-point cut in average discount ≈ ₹17.9 L a year.

2 Fix the brand & product mix

Buy the low-margin, heavily-discounted brands more tightly; give the high-margin stars more space and stock.

↳ Same sales, more profit; less cash tied in slow stock.

3 Clear the aging stock

Run a planned exit for the ₹1.44 Cr not sold in 6+ months, within the 36% ceiling.

↳ Frees cash and shelf space; lifts stock-turn from 0.7× upward.

4 Buy the right mix, not more stock

Reorder the 1184 fast items now out of stock, and shorten the buy on slow sizes.

↳ Recovers lost sales without adding to the overstock.

5 Capture every customer, then use the list

Get the phone number on every bill (now 67%). Send WhatsApp reminders to repeat and lapsed customers.

↳ Near-zero cost; repeat customers drive 63% of sales.

6 Manage by this dashboard every month

Track profit, discount, margin, stock-turn, dead stock, out-of-stock, repeat rate and price-held — refresh it monthly.

↳ Turns this study into an everyday habit.

How this was prepared. Built by the *store-dashboard* skill from this store's sales and stock-on-hand exports (fy 25-26 sales.xlsx, fy 26-27 sales.xlsx, june sales report.xlsx, soh30626.xlsx). Figures computed directly from the files; bill fields filled down; carry-bags and the stock total row removed; brand codes merged; every sold item matched to its cost in the stock file to estimate margin and profit.

Honest caveats. Cost of goods and profit are estimates (no cost column in sales); running costs use the 7%-of-sales + rent/power/misc figures in the config. Dead stock = not sold in the 10 months of data. A true conversion rate needs footfall data, which does not exist here.
