

GOODS INWARD MODULE

1. Store delivery and warehouse delivery one checkpoint/approval should be there
2. MRP for untagged goods = base price + 1.1% transport + GST + a per-category margin (30–35%, adjustable). The transport, tax and margin are calculated automatically – Different margins for local and outstation vendors also margins changes for high value items once we start will share you the margins allocations
3. GRN – There should be a report which will give us the recordings of order vs receiving
4. Cost and checks – One checkpoint to be added before it gets in warded at Patna
5. Store allocation – One approval point before it gets outwarded at store

Vendor Management Module

Buy & Sell(BNS)

KDPS owns outright.
Sub-types: with
vendorbarcode (MRP
capped) or without
barcode (KDPSsets
MRP).

None.(Only Defective)

Correction (25-18-10)

KDPS owns the goods; returns within a capped allowance, applied manually within the window. Allowance budgeted per brand per season.

Window alerts at 30 / 15 / 7 days. Alerts days will change

Buy & Sell (BNS) SOR

Outright — no returns. Closes at fully-received. Brand owns; all unsold returns, no cap. Reorder via a fresh booking. Window alerts at 30 / 15 / 7 days. Alerts days will change

Consignment

Brand owns; vendor takes back unsold stock. Rolling top-up. No cap.

Correction return allowance (season GR budget)

- Basis is set per brand: % of delivered value (e.g. 10% of ₹10,00,000 = ₹1,00,000) or % of delivered quantity (e.g. 10% of 2,000 pieces = 200 pieces). Default 10%, stretchable to 12–15%. – This should also suggest the returns based on per brand data entered
