

Hazaribagh — stock, sale-through, discount & margin

Item-wise stock holding at MRP, how much of it sold, what was given away in discount, what the store actually sold, and the margin it earned — category wise.

Period · Sep 25 – Jul 26

7,094 bills · 19,747 lines

Stock as on the export date · 17,049 SKU lines

Prepared 25 Jul 2026

1 · STOCK HOLDING (MRP) ₹6.01 Cr 26,716 pcs · 17,049 SKU lines · cost ₹3.81 Cr	2 · SALE-THROUGH 41.7% 19,141 pcs sold vs 26,716 pcs still on hand	3 · DISCOUNT GIVEN ₹69.0 L 17.9% off the tag value of what was sold
4 · ACTUAL SALES ₹3.16 Cr tag value ₹3.85 Cr less discount	5 · MARGIN EARNED ₹69.6 L 22.1% of sales · would be 37% at full price	BREAK-EVEN DISCOUNT 37% goods cost 63% of tag — beyond this you sell below cost

THE FIVE ANSWERS

Everything asked, on one line each

Period Sep 25 – Jul 26 (11 months, 7,094 bills). Stock is the current snapshot. Packaging (carry bags) is excluded from every merchandise number.

1 · STOCK HOLDING Item-wise stock on hand, valued at MRP ₹6.01 Cr 26,716 pcs · cost ₹3.81 Cr	2 · SALE-THROUGH Share of goods handled that actually sold 41.7% 19,141 sold / 45,857 handled
3 · DISCOUNT GIVEN Given away against the tag price of goods sold ₹69.0 L 17.9% of ₹3.85 Cr tag value	4 · ACTUAL SALES What the customer actually paid, after discount & returns ₹3.16 Cr

avg bill ₹4,449

5 • MARGIN EARNED

Actual sales less the cost of the goods sold

₹69.6 L

22.1% of sales

The one number that explains the rest. Goods are bought at about **63% of the tag price**, so the most this store can ever earn is **37%**. It actually earned **22.1%**. The whole gap is discount: **₹69.0 L** was given away on ₹3.85 Cr of tag value. **Any discount above 37% sells the item below cost.**

ANSWER 5 • CATEGORY WISE

Margin earned, category wise

All money columns in **₹ lakh**. Margin = actual sales – cost of the goods sold. Margin % is on actual sales. Sale-through = sold ÷ (sold + still in stock).

CATEGORY	STOCK QTY	STOCK @ MRP	SOLD QTY	SOLD @ MRP	SALE-THRU	DISCOUNT	DISC %	ACTUAL SALES
Casual Wear	14,489	305.6	8,366	185.3	37%	45.1	24%	140.2
Formal Wear	3,170	106.0	1,926	48.1	38%	6.6	14%	41.5
Party Wear	2,406	84.6	1,421	47.2	37%	2.3	5%	44.9
Seasonal Wear	2,538	54.0	3,237	76.2	56%	11.4	15%	64.9
Accessories	1,521	15.3	1,254	7.6	45%	1.4	18%	6.2
Promotional	145	9.4	150	1.4	51%	0.9	61%	0.6
Traditional Wear	378	9.2	335	6.2	47%	0.3	4%	6.0
Nightwear	425	5.3	255	2.9	38%	0.2	6%	2.7
Innerwear	1,099	4.4	1,877	4.5	63%	0.3	6%	4.2
Sports Wear	166	2.0	66	0.6	28%	0.1	16%	0.5
Winter Wear	225	2.0	158	2.4	41%	0.4	17%	2.0
Fabric	77	1.6	15	0.3	16%	0.0	1%	0.3
Winter Set	72	1.3	34	0.7	32%	0.1	7%	0.7
Other / Unclassified	5	0.1	47	1.1	90%	0.2	20%	0.9
TOTAL	26,716	600.9	19,141	384.6	42%	69.0	18%	315.6

Where the margin actually comes from

Rupees of margin earned, by category (₹ lakh).

Green = healthy 30%+, gold = 15–30%, red = under 15%.

Casual Wear		₹15.3 L (11%)
Seasonal Wear		₹18.8 L (29%)
Party Wear		₹17.4 L (39%)
Formal Wear		₹10.4 L (25%)
Accessories		₹2.6 L (42%)
Traditional Wear		₹2.0 L (34%)
Innerwear		₹0.9 L (20%)
Nightwear		₹0.6 L (23%)
Winter Wear		₹0.7 L (33%)

How much of each category sold

Sale-through %, biggest stock holdings first. Value in brackets = stock still on hand at MRP.

Casual Wear		37% (₹305.6 L left)
Formal Wear		38% (₹106.0 L left)
Party Wear		37% (₹84.6 L left)
Seasonal Wear		56% (₹54.0 L left)
Accessories		45% (₹15.3 L left)
Promotional		51% (₹9.4 L left)
Traditional Wear		47% (₹9.2 L left)
Nightwear		38% (₹5.3 L left)
Innerwear		63% (₹4.4 L left)

Casual wear is the problem. It is half the shop — ₹305.6 L of stock at MRP and ₹140.2 L of sales — but it is discounted **24%** and returns only **11%** margin. It contributes 44% of sales but only 22% of the margin.

Party, seasonal and traditional wear carry the store. Together they are 37% of sales but 55% of the margin — because they are barely discounted (5–15%) and bought at a better rate.

ANSWERS 1–4 · ITEM WISE

Item-wise stock holding, sale-through, discount and sales

Every item type, biggest stock holding first. Money in ₹ lakh. **Cover** = how many months the stock on hand would last at the current selling rate.

Item	Stock Qty	Stock @ MRP	Sold Qty	Sale-Thru	Cover	Discount	Disc %
Shirt	4,056	87.3	2,314	36%	19 mo	14.2	27%
Jeans	3,174	85.0	1,795	36%	19 mo	15.2	30%
Saree	1,994	63.9	2,167	52%	10 mo	2.6	5%
T-Shirt	3,419	49.6	1,697	33%	22 mo	5.9	24%
Kurti Set	1,821	46.0	1,509	45%	13 mo	2.4	7%
Suit	408	43.8	228	36%	20 mo	1.5	10%
Trouser	1,719	40.3	877	34%	22 mo	6.2	28%
Blazer	308	20.0	228	43%	15 mo	3.3	26%
Dresses	792	17.7	361	31%	24 mo	0.3	5%
Lehenga	154	16.0	94	38%	18 mo	0.4	5%
Salwar Suit	457	13.2	386	46%	13 mo	0.5	5%

Belt	94	2.7	101	52%	10 mo	0.2	21%
Frock	223	2.6	76	25%	32 mo	0.0	4%
Shorts	273	2.4	119	30%	25 mo	0.0	6%

ITEM	STOCK QTY	STOCK @ MRP	SOLD QTY	SALE-THRU	COVER	DISCOUNT	DISC %
Co-Ord Set	126	2.2	61	33%	23 mo	0.1	7%
Nightly	172	2.1	117	40%	16 mo	0.1	5%
Cardigan	127	2.0	152	54%	9 mo	0.4	13%
All other 69 items	3,766	27.3	4,124	52%	—	2.3	9%
TOTAL — all items	26,716	600.9	19,141	42%	—	69.0	18%

Fix first Big stock, thin margin

These hold heavy stock at MRP but return under 15% margin because of the discount they carry:

- **Shirt** — ₹87.3 L in stock, sold ₹39.3 L at 27% discount, margin **3%**
- **Jeans** — ₹85.0 L in stock, sold ₹36.1 L at 30% discount, margin **10%**
- **T-Shirt** — ₹49.6 L in stock, sold ₹18.3 L at 24% discount, margin **8%**
- **Trouser** — ₹40.3 L in stock, sold ₹15.7 L at 28% discount, margin **-2%**
- **Blazer** — ₹20.0 L in stock, sold ₹9.3 L at 26% discount, margin **13%**

Watch Slow movers

Over ₹3.0 L of stock at MRP with under 30% sale-through — money sitting still:

- **Backpack** — ₹9.3 L in stock, only 28% sold through (147 pcs left)
- **Palazzo Set** — ₹3.6 L in stock, only 15% sold through (129 pcs left)
- **Duffel Bag** — ₹3.4 L in stock, only 12% sold through (67 pcs left)

Protect The earners

Items doing over ₹5.0 L of sales at 30%+ margin — these pay for the shop. Do not put them into blanket sale schemes:

- **Saree** — ₹48.6 L sales, 5% discount, margin **₹17.8 L (37%)**
- **Kurti Set** — ₹32.0 L sales, 7% discount, margin **₹10.6 L (33%)**
- **Suit** — ₹14.1 L sales, 10% discount, margin **₹5.0 L (35%)**
- **Salwar Suit** — ₹9.8 L sales, 5% discount, margin **₹3.6 L (37%)**
- **Lehenga** — ₹7.7 L sales, 5% discount, margin **₹3.4 L (44%)**
- **Dresses** — ₹6.6 L sales, 5% discount, margin **₹2.3 L (35%)**

Every rupee of sale, sorted by how deep the discount was

Goods cost 63% of the tag, so **37% is the break-even discount**. Everything sold below that line was sold at a loss. Money in ₹ lakh.

DISCOUNT BAND	QTY	SOLD @ MRP	DISCOUNT	ACTUAL SALES	% OF SALES	COST OF G
0% (full price)	9,987	165.8	5.2	160.6	51%	
1-10%	4,298	82.9	5.0	77.8	25%	
10-20%	710	15.7	3.1	12.7	4%	
20-30%	901	23.8	7.0	16.8	5%	
30-36.7%	55	0.9	0.3	0.6	0%	
36.7-50%	2,455	74.0	34.2	39.7	13%	
50-70%	511	16.5	9.1	7.4	2%	
100% (free)	224	5.1	5.1	0.0	0%	

₹15.6 L of margin was destroyed below the line. 15% of sales (₹47.2 L) happened at discounts deeper than 37% — and that slice lost **₹15.6 L**. Without it the store's margin would have been **32%** instead of 22%.

Full-price selling is 51% of sales and earns 35%. Half this store already sells at tag price. The margin problem is entirely in the deep-discount tail, not in the everyday business.

MONTH BY MONTH

When the discount was given

Bar height = actual sales. The number under each bar is that month's margin %. Money in ₹ lakh.

MONTH	BILLS	QTY	SOLD @ MRP	DISCOUNT	DISC %	ACTUAL SALES	COST OF GOODS
Sep 25	543	1,626	25.9	2.2	8%	23.7	
Oct 25	576	1,459	23.2	1.2	5%	22.1	
Nov 25	708	1,810	35.9	3.3	9%	32.6	
Dec 25	536	1,199	25.6	5.0	19%	20.7	
Jan 26	898	2,623	66.5	26.4	40%	40.0	
Feb 26	614	1,659	38.0	8.5	22%	29.5	
Mar 26	736	1,961	37.7	3.3	9%	34.4	
Apr 26	908	2,544	51.4	3.1	6%	48.3	
May 26	509	1,290	22.0	1.4	6%	20.6	
Jun 26	619	1,742	32.8	6.1	18%	26.7	
Jul 26	447	1,228	25.7	8.8	34%	17.0	

January is where the year was lost. ₹26.4 L of discount in one month (40% off tag) turned ₹40.0 L of sales into a **₹2.5 L loss** on goods. July is heading the same way at 34% discount and 0% margin. The clean months — Sep, Oct, Nov, Mar, Apr, May — all ran 30%+ margin at under 10% discount.

BRAND VIEW

The same five measures, brand wise

Top 18 brands by stock held at MRP. **Buy margin** is what the brand gives you before any discount — it is the ceiling on what that brand can ever earn. Money in **₹ lakh**.

BRAND	STOCK QTY	STOCK @ MRP	SALE-THRU	DISC %	ACTUAL SALES	MARGIN
Van Heusen	1,261	46.2	37%	29%	16.6	0.0
Louis Philippe	1,036	38.8	36%	30%	14.9	1.0
Allen Solly	1,251	38.4	47%	34%	17.8	0.0
Arrow	935	29.0	30%	31%	7.7	-0.0
U.S. Polo	727	20.9	50%	27%	18.6	2.0
Killer	700	19.8	53%	35%	13.6	-1.0
Peter England	1,031	18.7	24%	31%	5.5	0.0
Levis	477	17.2	50%	36%	10.6	-0.0
Spykar	450	14.9	11%	34%	1.0	-0.0
Banjaran	420	10.8	11%	5%	1.3	0.0
Allen Solly Junior	527	8.5	24%	22%	2.1	0.0
Citrus	608	8.2	34%	3%	4.0	0.0
Fashion World	280	7.6	17%	6%	1.1	0.0
Mufti	228	7.5	60%	38%	6.9	0.0
Blackberrys	68	7.2	59%	15%	3.1	0.0
U. S. Polo Kids	392	7.1	11%	34%	0.7	-0.0
Jay Ambey	110	6.8	54%	5%	5.9	2.0
Yes Mam	204	6.4	49%	5%	5.2	1.0

The national menswear brands are bought thin and discounted deep. Van Heusen, Arrow, U.S. Polo, Killer, Peter England, Levis, Spykar and Allen Solly are bought at a **26–35% buy margin** — and then sold at 25–35% discount. That is exactly why Arrow, Killer, Levis and U.S. Polo Kids show a **negative margin** despite large sales: the discount eats the entire buy margin and then some. Either the buy terms improve, or these brands stay out of deep schemes.

HOW THESE NUMBERS WERE BUILT

Method & honest caveats

- **Stock @ MRP** = stock qty × MRP from the stock file. Cost value = qty × the file's Rate column.
- **Actual sales** = the Net Amount column, i.e. after discount and net of 946 returned pieces (₹18.5 L).
- **Sale-through** = sold qty ÷ (sold qty + stock qty). Opening stock was not supplied, so this uses the closing snapshot.
- **Cost of goods sold is estimated.** The sales export carries no cost column, so each sold line was matched to the stock file for its cost-to-MRP ratio: barcode first, then brand+item, then item, then brand.
- Match quality: 29% of cost matched on exact barcode, 64% on brand+item, 7% on item, 0.3% on brand/overall average.
- **Carry bags excluded** — 6,447 lines / 7,027 pcs of packaging, ₹1,941 of sales. They are not merchandise.
- The stock file's own grand-total row was dropped (it otherwise doubles every total).
- Item names were normalised across the two files (Sarees → Saree, Trousers → Trouser, Sweat Shirt → Sweatshirt) so stock and sales line up.
- Categories come from the stock file. Around 0.2% of sold lines carried a junk category code and were classified from their item name instead.
- **Not included:** rent, salary, power and other running costs. Margin here is gross — goods only.
- **Gift / promotional stock** (145 pcs, ₹9.4 L at MRP) carries an inflated tag against a near-zero cost — it is kept out of the brand buy-margin column so it does not flatter the brands.
- Free/gift items (224 pcs, ₹5.1 L at MRP) show as 100% discount and a full-cost loss — that is the real cost of the gift scheme.

One data-quality flag. The sales export's own trailing total row does not reconcile with its line items, and the stock file's total row is ₹4,84,973 above the sum of its rows. Everything in this report is computed from the line items, which are internally consistent.

Hazaribagh store report. Built from the store's POS sales export and stock-on-hand export. Cost of goods — and therefore margin — is an estimate: the sales export has no cost column, so every sold line was matched to the stock file for its cost. Margin is gross (goods only); rent, salary and power are not deducted. Generated 25 Jul 2026.
