

The KDPS System — What's Built So Far

A plain snapshot of where the system stands today. It already runs in any web browser — nothing to install. Below is what your team can use now, and what comes next.

Ready to use today LIVE · EARLY ACCESS

GETTING IN & SECURITY

- ✓ **Secure login with fine-grained roles.** 9 role-based views — owner, store staff, warehouse, finance, admin, etc. Store staff see only their assigned store location. Includes break-glass superuser access.
- ✓ **13-section sidebar navigation.** Single URL per screen, profile tile, off-canvas drawer on mobile devices, and Dark Mode support (Light / Dark / System).
- ✓ **Global search bar.** Top-bar search bar supporting barcode wedge-scanning across items, documents, and customers.

YOUR BACKBONE RECORDS (MASTER DATA)

- ✓ **Stores & warehouses, Brands, Seasons, GST registrations (Bihar & Jharkhand), Users & Roles** — view, add and edit, all in one place.
- ✓ **Customer master.** Integrated customer registry with instant counter typeahead and till history.

DAY-TO-DAY DOCUMENTS & GOODS INWARD

- ✓ **Vendor bookings.** Record seasonal bookings for each brand.
- ✓ **Goods inward (GRN).** Receive shipments into stores or warehouses with automatic distinction for branded vs non-branded and tagged vs non-tagged items.
- ✓ **Self-improving PT converter.** Converts brand PT / invoice files into clean stock data. Automatically remembers human corrections, line-item edits, and bulk fill corrections. Uncertain lines go to a review list.

TRANSFERS, RETURNS & STOCK CONTROL

- ✓ **Scan-based transfers.** Scan out at dispatch, scan in at receipt, with real-time in-transit stock tracking between stores and warehouses. Prints transfer PT documents automatically.
- ✓ **Discrepancy & damaged stock handling.** Automatic flagging for short, extra, or damaged receipts. Store reports damage, warehouse confirms into quarantine stock.
- ✓ **Approvals inbox & Maker-Checker controls.** Senior approval required for transfers, variance tolerances, and stock write-offs. No self-approvals.
- ✓ **Physical stock count.** Blind stock counting workflow where counters enter physical counts without seeing book stock, producing automated variance reports.

SELLING AT THE COUNTER (POS & BILLING)

- ✓ **Scanner-first POS counter room.** Dedicated fast billing interface built directly into the system with barcode scanning and audio feedback.

- ✓ **Integrated returns & exchanges.** Process returns and exchanges directly at the billing counter with money-in-only rules (credit notes retired).
- ✓ **Crash-proof counter cart safety.** Automatic draft saving survives browser crashes, instant undo stack, and rescan quantity increments.
- ✓ **Flexible payment rail.** Cash, cards, customer prefill, and instant UPI charge card via mock payment adapter.
- ✓ **Counter controls & Receipts.** Manager discount dials with limit policies, GST breakup popovers, and bill printing with barcode generation.

STOCK & MONEY (THE BOOKS)

- ✓ **Stock ledger & Stock on hand.** Every movement and live quantity tracked by item: style, size *and* colour.
- ✓ **Vendor ledger & Cash ledger.** Vendor dues with ageing, plus complete cash tracking.
- ✓ **In-app Workspace inbox.** Notifications and team messages accessible directly inside the system header.
- ✓ **Self-balancing books.** Stock value and brand dues stay in balance at all times, with SOR and outright brands handled correctly and GST built in.

Coming next **BUILDING, ONE AT A TIME**

Built in order so each part is checked and correct before the next begins.

- › **Vendor payments & Bank reconciliation** — maker-checker payment approvals, bank statement recon, and collections.
- › **Tally export & Statutory connections** — export sales, purchases, and GST ledgers directly to Tally.
- › **Business intelligence & Analytics** — brand / store / season P&L, dead-stock and ageing alerts, demand forecasting, custom report builder.
- › **Promotions & EOSS** — scheme management (slabs, BOGO, gifts), EOSS bulk billing, and markdown planning.
- › **HRMS & Payroll** — face check-in attendance, employee records, sales commission and incentive calculation.
- › **Morning brief (AI)** — suggest-only daily executive summary (AI suggests, human approves).
